Industrial Series Gas Pro®

Part number: 5775-J-GCV

Application: D Model White/Superior (SGTD)

Interchange Numbers:

040-070-001 (Cooper)

034-220 (Generant)

031-665 (Generant)

Industrial Series Gas Pro is a new and improved design from the OE style. (See comparison below)

- The simplicity of the internal workings of this valve makes it longer lasting, easier to clean and more efficient.
- The 5775-J-GCV offers much better corrosion protection and extended run-time hours between cleanings.
- This late model style check valve was designed specifically for the D Model engines.
- Some customers have commented that the advanced internal design improves the low-speed idle characteristics of the engine.
- These are manufactured in the United States in a certified ISO 9001 facility. The highest-grade metals, ISO and AS9100 certified machining standards are used in producing this product.
